AI-Powered Classification
Output

Input received "Expense reimbursement from 3 weeks ago still hasn't been processed"

#TK-1092

Expense reimbursement overdue by 3 weeks — requires manual processing review

Medium

CATEGORY

Reimbursement

REGION

GLOBAL (not specified)

SLA TARGET

2 business days

ASSIGNED TO

Payroll Analyst

ESTIMATED IMPACT

Low (under \$500)

DATE SUBMITTED

2026-05-20

ESCALATION RULE

Flag to Team Lead at 80% of SLA window if unresolved — no immediate escalation required

ACTION REQUIRED

Verify original submission date and approval chain status. Confirm whether delay is a system issue or pending manager approval. Process manually if approval confirmed and system delay identified.

AI CLASSIFICATION REASONING

Reimbursement delays do not prevent salary payment and carry no immediate compliance risk, placing this issue at Medium severity under the Priority Matrix. The 3-week delay significantly exceeds standard processing time of 5–7 business days, indicating either a system processing failure or a stalled approval chain. No region was specified in the submission, so the ticket is flagged as GLOBAL and the assigned Payroll Analyst should confirm the employee's region before processing to apply the correct reimbursement policy.
